Directed by Felipe Morgado and Tamara Uribe, the feature-length documentary reveals what went unseen during Chile's most significant constitutional process, following close debates on social justice and the environment and the conflicts of interest that surfaced across the political spectrum.

After its standout run at international festivals and in Chilean theaters, the Miradoc platform debuts Oasis on streaming—the new feature-length film by the MAFI Collective (Mapa Fílmico de un País)—available for digital rental across Latin America starting Monday, October 13.
